NovaCart Annual Report 2025-26

1. Company Overview

NovaCart is an online shopping company started in 2019 in Bhopal, Madhya Pradesh. It sells electronics, home products and fashion items across India. The company was founded by Riya Sharma and Karan Mehta. The head office is in Bhopal and there are two warehouses, one in Indore and one in Pune.

In the year 2025-26, NovaCart served customers in 410 cities. The mobile app was downloaded 2.3 million times during the year. The company had 1,250 employees at the end of March 2026.

The mission of NovaCart is to make online shopping simple and affordable for small towns in India. The company focuses on fast delivery and easy returns.

2. Sales Performance

Total revenue for 2025-26 was 480 crore rupees, which is 32 percent higher than 2024-25 when revenue was 364 crore rupees. The net profit for the year was 21 crore rupees.

The table below shows revenue by category for the year.

Category	Revenue (crore)	Share
Electronics	216	45%
Home Products	120	25%
Fashion	96	20%
Others	48	10%

Electronics was the best selling category. The best month was October 2025 because of the festival sale, when sales reached 68 crore rupees in a single month. The weakest month was June 2025 with 28 crore rupees.

3. Customers and Returns

NovaCart had 1.8 million active customers at the end of the year. About 41 percent of the customers made more than one purchase during the year. The average order value was 1,850 rupees.

The return rate was 9 percent of all orders. Most returns happened in the fashion category because of size problems. To fix this, the company added a size guide and a virtual try-on feature in January 2026. After this change, fashion returns went down from 14 percent to 10 percent.

Customer rating on the app store was 4.3 out of 5. The most common complaint was late delivery in rural areas. Average delivery time was 3.2 days.

4. Team and Hiring

The company has 1,250 employees. Out of these, 420 work in technology, 310 in logistics, 280 in customer support and 240 in sales and marketing. The rest work in finance and HR.

In 2025-26, NovaCart hired 310 new employees. The company started a fresher hiring programme and took in 60 fresher data analysts and engineers from colleges in Madhya Pradesh. The starting stipend for interns is 25,000 rupees per month.

Employee attrition was 12 percent, which is lower than the industry average of 18 percent. Employees get a work from home option for 2 days every week.

5. Plans for 2026-27

NovaCart plans to reach 600 crore rupees in revenue in 2026-27. The company will open a third warehouse in Nagpur by September 2026 to reduce delivery time to 2.5 days.

The technology team will launch an AI shopping assistant in the app by December 2026. The assistant will help customers find products using simple chat. The company will also start a Hindi and Marathi language option in the app.

The company will spend 35 crore rupees on technology and 20 crore rupees on the new warehouse. NovaCart also plans to hire 400 more employees, including 100 freshers.
